
LEIPSIC, OHIO (Mile 106.0)

Population 1571. Served by D T & I, B & O, & Nickel Plate. The three steam railroads interchange cars and reciprocal switching is in effect.

At the south end of Leipsic, the D T & I crosses the B.& O., the crossings being protected by a mechanical interlocking plant. The D T & I-B & O interchange holds 7 cars, but a verbal arrangement is in effect whereby the B & O delivers and receives cars from the D T & I on the NKP interchange tracks when there are too many cars to place on the D T & I-B & O interchange.

The crossing of the D T & I and the Fort Wayne Division of the NKP is protected by an electric interlocking plant. The D T & I to NKP interchange track holds about 52 cars and the NKP to D T & I track holds about 80 cars.

There are about 12 shippers, none of importance. In 1930 the traffic handled was:

	Rec'd	Forw'd	From Conn's	To Conn's
F	0	0	1219	3158
O	81	7	2259	2670
T	81	7	3478	5828
